Education

Nagesh Karajagi Orchid College of Engg. & Tech., Solapur

2022 – 2026

B.Tech in Electrical Engineering

CGPA- 7.26

Technical Skills

Languages: Core Java, SQL

Testing: Manual Testing (SDLC, STLC, Test Case Design, Bug Life Cycle)

Databases: MySQL

Tools: VS Code, MySQL Workbench, MS Excel, Git, GitHub, Matlab

Projects

Hotel Booking Management System | Oracle SQL, SQL*Plus

- Developed a database project to manage hotel customers, rooms, bookings, payments, and reviews using Oracle SQL and SQL*Plus.
- Created 6 tables and connected them using Primary Key and Foreign Key relationships.
- Used SQL queries like Joins, Group By, Having Clause, and Subqueries to generate booking and payment reports.
- Performed operations such as room booking management, payment tracking, and customer review handling through SQL queries.

Waste To Wealth – Community Exchange Platform | Java Swing, MySQL, JDBC

- Developed a desktop application to connect donors and receivers for exchanging unused items, reducing waste through community participation.
- Built 10+ UI pages using Java Swing with custom-painted rounded cards, scrollable forms, placeholder fields, and role-based navigation flow.
- Implemented donor and receiver registration with 8-point form validation (regex for email, phone, Aadhaar, pincode) and duplicate account detection using JDBC queries.

Manual Testing – Cyclos Web Application (Login Module) | Manual Testing, MS Excel, STLC |

- Performed functional testing of the Login module of **Cyclos**, a real-world web-based banking & payment platform, designing **11 test cases** (TC_CYCLOS_01 to TC_CYCLOS_11) with critical severity.
- Covered positive and negative scenarios – valid/invalid credentials, blank fields, empty form submission, and password masking.

Internship/Training

QSpiders

Feb 2026 – Present

Java Full Stack Trainee

Pune, Maharashtra

- Completed SQL with hands-on practice in database design, queries, joins, subqueries, and normalization concepts.
- Currently undergoing Core Java fundamentals including data types, operators, control flow statements, methods, arrays, OOP concepts, static and non-static members.
- Gained practical knowledge in Manual Testing, including SDLC, STLC, Test Case Design, Defect Lifecycle, and Functional Non-Functional Testing.
- Actively developing technical, debugging, and analytical skills through coding exercises and real-world project implementation.

Certifications

- Core Java – Udemy
- Operating Systems – NPTEL

Leadership / Extracurricular

Training & Placement Cell

Nov 2024 – Nov 2025

Volunteer

NKOCET, Solapur

- Coordinated **5+ campus recruitment drives**, managing logistics and student communication for visiting companies.
- Mentored **50+ students** in resume building, mock interviews, and aptitude preparation for placements.

Competitive Programming

Nov 2022

Individual Contributor

- Earned **50+ certificates** on Unstop through active participation in coding contests and quizzes.
- Maintained an active GitHub profile with **150+ commits** across 2025–2026, consistently contributing to personal and academic projects.
